EDUCATION

• Bachelor of Science in Design and Computing

Birla Institute of Science and Technology, Pilani

2021-2025

CGPA: 8.34

EXPERIENCE

• HCLTech

Sept 15, 2021 - Present

LangGraph, Python, RAG, MCP Client, GCP, Azure

HCL Internal - AI Agent Development

- Built AI Agent for Jira/Azure DevOps using LangGraph, Python, MCP Client, RAG, Vector DB (FAISS), and Postgres to automate sprint workflows and calculate user story readiness scores based on project-specific Definition of Ready (DOR).
- Integrated MCP servers of Atlassian Jira/Azure DevOps to enable automated actions on sprints and user stories, with management exploring deployment across multiple HCLTech clients.

Unilever - Cloud & Infrastructure Management

- Provided Azure and GCP cloud administration for 2 years, provisioning VMs, managing Resource Groups, and configuring load balancers to optimize traffic distribution, improving system uptime by 15%.
- Managed virtual and physical infrastructure using SCVMM, Failover Clusters, and Hypervisors. Maintained certifications: AZ-900, GCP Associate Cloud Engineer, and Professional Cloud Architect.

MIG (Motorists Insurance Groups) - Automation

- Automated document management workflows using Python, including Filenet extraction/uploading, Excel file processing, and validation report generation across multiple directories.

PROJECTS

• Smart Attendance System

Automated attendance tracking using face recognition technology

Flask, OpenCV, SQLite

- Designed an automated attendance system for educational institutions using face recognition, achieving over 95% accuracy through an ensemble of ML algorithms including LBPH, SVM, KNN, and Random Forest.
- Built Flask-based application with OpenCV for face detection and SQLite for attendance management, enabling real-time tracking and duplicate prevention.
- Developed admin dashboard for attendance management and report generation, improving administrative efficiency.

• TasteBuds - Food Ordering Platform

Internal food ordering application for HCL Madurai cafeteria

Node.js, MongoDB, React

- Won LeaderBoard Award at HackBees (Hackathon) 1.0 for developing a full-stack food ordering platform enabling HCL Madurai employees to pre-order meals from the cafeteria.
- Integrated Random Forest Classifier to predict next-day best-selling products, optimizing inventory management and reducing food waste.
- Built scalable architecture using Node.js for vendor portal and MongoDB for order management, streamlining communication between employees and vendors.

TECHNICAL SKILLS

Languages: Python, Javascript, SQL

Skills : Tensorflow, Pytorch, React JS, API Integration, DSA, AI Agents, Lang Graph, Lang chain

Tools: VS Code, Git, GitHub, Jupyter Notebook, PostgreSQL

Cloud/Databases: Relational Database (MySQL), NoSQL(MongoDB), Azure DevOps

CERTIFICATIONS

- Microsoft AZ-900 Certified: Azure Fundamentals.
- Python for Data Science - NPTEL.
- JavaScript - Hacker Rank.
- Google Cloud Certified - Associate Cloud Engineer.
- Google Cloud Certified - Professional Cloud Architect.
- Machine Learning Internship Training Certificate - Corizo.
